# Independent Evaluation Laboratory

---

The lab tries to establish a long-term research agenda to promote **evidence based-interventions and policies** by

- ❑ Conducting rigorous **impact evaluations** to promote the dissemination of programs that are shown to be effective
- ❑ Producing the **knowledge base** to inform policy and practice, such as identifying protective and risk factors influencing the development areas
- ❑ Conducting **systematic reviews** to create catalogs of effective programs that can be adapted and transported to other countries
- ❑ **For whom and how?** Examining which program components work which don't to ensure outcome- and cost-effective interventions

## Research Expertise

- ❑ Effectiveness Evaluation
- ❑ Optimizing Interventions
- ❑ Methodological Innovations
- ❑ Advanced Data Analysis
- ❑ Systematic Reviews of Evidence

## Areas

- ❑ Child and Youth
- ❑ Education
- ❑ Health
- ❑ Social Policy
- ❑ Workforce Development
