

# Software for High Performance Computing

**Assoc. Prof. Didem Unat**  
Department of Computer Engineering  
Koç University

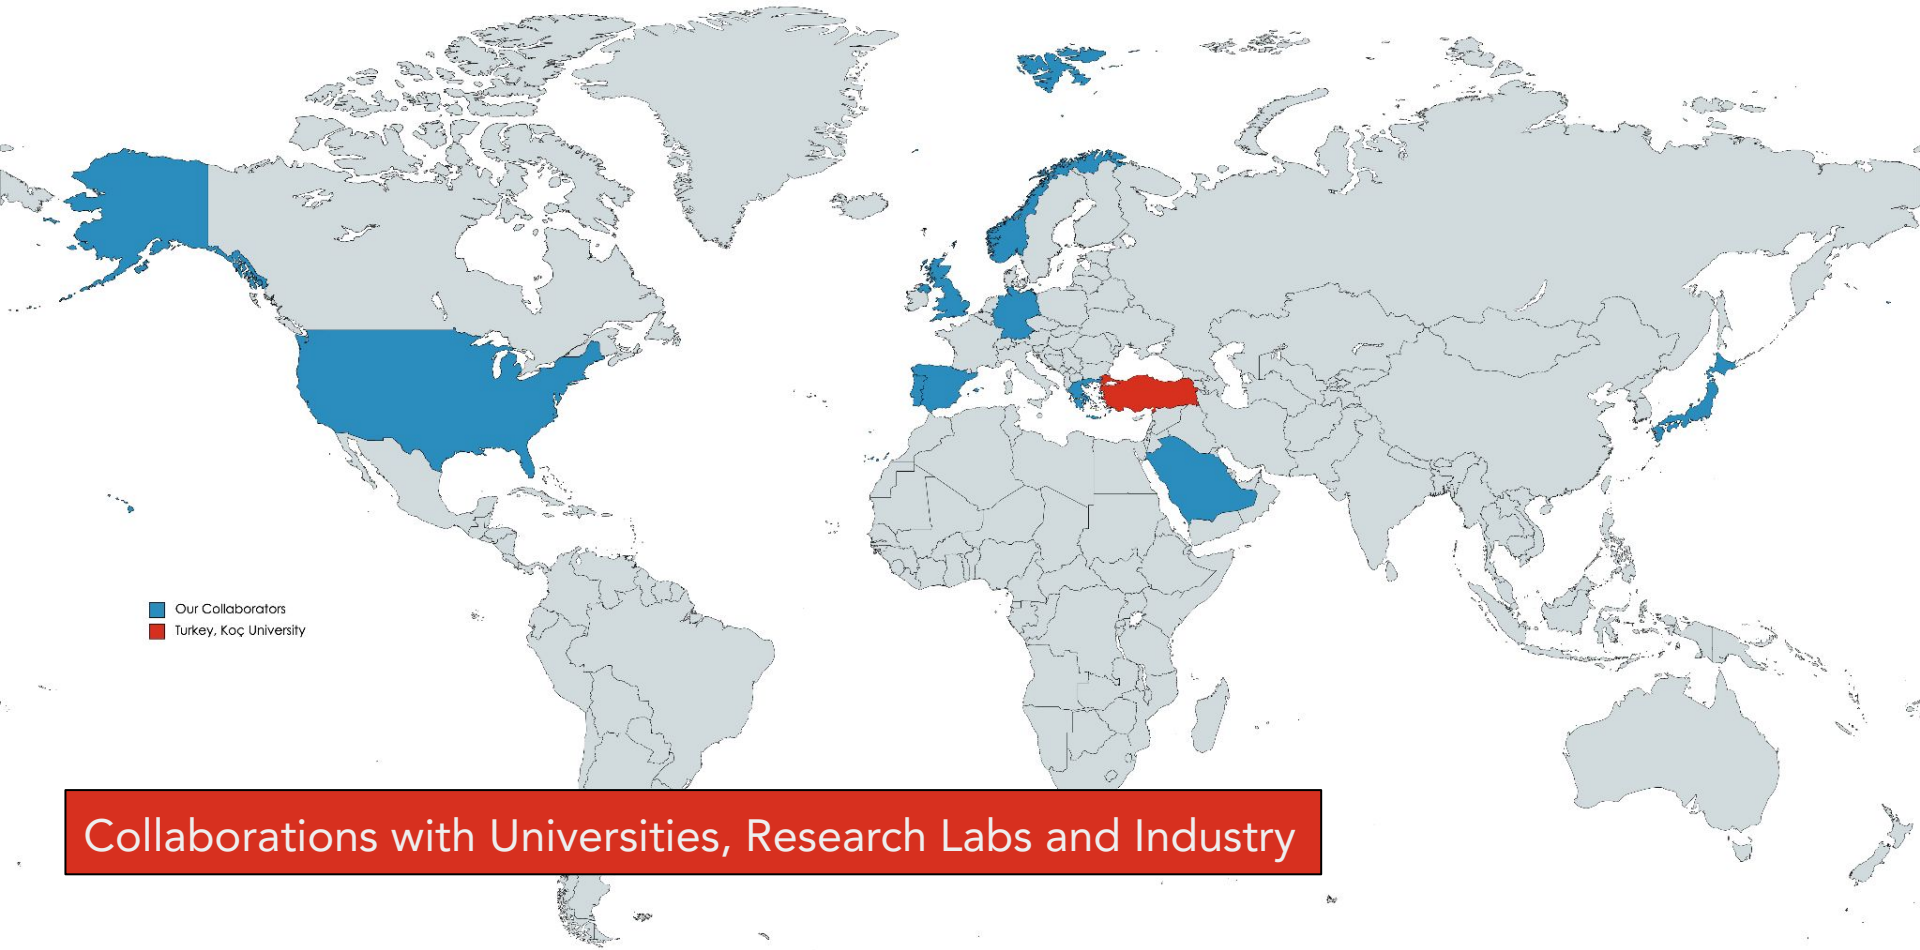

# My Research Group

- Deals with software challenges of emerging architectures
  - Programming Model Design
    - To simplify programming on complex parallel architectures
  - Runtime Systems
    - Reduce communication cost to scale on thousands of processors
  - Performance Tools
    - Design and develop tools for performance modeling and monitoring
  - Systems Research for Deep Learning
    - Scale deep learning frameworks on multiple devices

# My Research Group

Collaborations with Universities, Research Labs and Industry

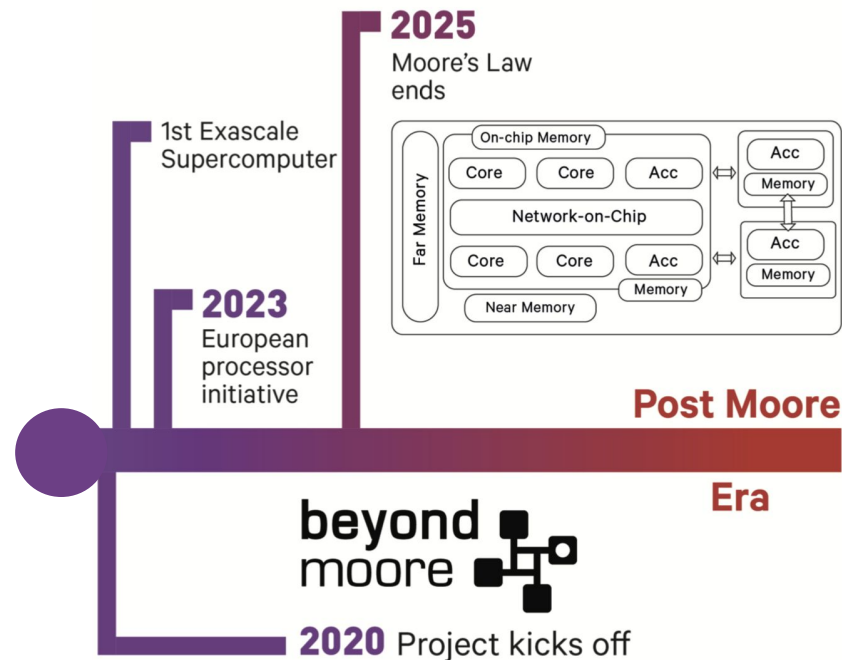

**European Research Council**

Established by the European Commission

**1.5 Million Euros**

**Supporting top  
researchers anywhere in  
the world**

**First ERC grant received  
from Turkey in  
Computer Science**

## An Optimization and Co-design Framework for Sparse Computation

2.6 Million Euros

**Project Coordinator in an  
European consortium with 6  
partners**

**EuroHPC**  
Joint Undertaking

This project has received funding from the European High-Performance Computing Joint Undertaking under grant agreement No. 956213.
